

# WTT Syzygy Swing Trader

Quick Reference Guide

R1.38

## Quick Setup

### 1. Add

Indicator to chart

### 2. Configure

Lookback: 7, enable alerts

### 3. Monitor

Lime green (long) or pink (short)

### 4. Trade

Enter at breakout level

Best on 4H/Daily timeframes!

## Features & Settings

- Swing Detection: Auto high/low identification
- Breakout Lines: Dynamic support/resistance
- Risk-Reward: 1:1 ratio targets
- Profit Taking: 50% partial exit at 1:1 R:R
- Trailing Stop: Activates at 0.5 R:R
- Volume Filter: Optional breakout filtering
- RSI Integration: Momentum analysis in HUD

## Trading Strategy

- LONG: Lime Green breakout above swing high
- SHORT: Deep Pink breakdown below swing low
- Entry: At breakout/breakdown level
- Stop Loss: Opposite swing point
- Take Profit: 1:1 risk-reward ratio
- Partial Exit: 50% at 1:1 R:R, trailing at 0.5 R:R

## Visual Guide

Lime Green - Long Deep Pink - Short Blue - Stop Loss Orange - Trailing

HUD Table Shows: Signal & R:R, Entry & Distance, Success Rate, Position & PM, Volume & Filter, RSI Status

## Volume Filter

- Enable Filter: Toggle to filter breakouts by volume
- Threshold: Z-score (-2.0 to 2.0, default: 0.0)
- PASS: Volume z-score  $\geq$  threshold
- BLOCK: Volume z-score  $<$  threshold

### Conservative

1.0 (High volume)

### Moderate

0.5 (Above avg)

### Default

0.0 (Avg volume)

### Aggressive

-0.5 (Avoid low)

Focus on high-conviction breakouts with institutional support!

## RSI Integration

- RSI Display: Shows in HUD table with status
- Oversold: RSI  $\leq$  30 (bright green)
- Bullish: RSI  $>$  50 (darker green)
- Bearish: RSI  $<$  50 (darker red)
- Overbought: RSI  $\geq$  70 (bright red)
- Neutral: RSI = 50 (orange)

Bright colors signal extreme conditions (reversal opportunities), darker colors show moderate momentum!

## Alerts & Tips

- Breakout/Breakdown: Symbol, price, stop loss, profit target
- Trailing Stop: When activated with new stop level
- Volume Filter: Only triggers when volume z-score  $\geq$  threshold
- Use 4H/Daily timeframes for best results
- Use volume filter to avoid low-conviction breakouts
- Monitor success rate and use partial exits
- Enhanced HUD header for better visibility

Complete trade setup info in every alert!
